

Photometer TS-1000

Water quality analyzer photometer TS-1000 uses the latest optoelectronic technology and microprocessor technology, and is widely applied to detecting in SWIMMING POOL, AQUARIUM, DRINKING WATER, INDUSTRIAL WASTEWATER and others. The instrument is simple, practical and accurate. It can provide reliable test results for customers.

WATER QUALITY ANALYZER

Photometer TS-1000

MORE INFORMATION

INTRODUCTION	
Function	Testing 7/6 elements of SWIMMING POOL / AQUARIUM
Features	 <ul style="list-style-type: none"> ① 32-bit single-chip microcomputer, minimizes peripheral devices and improves product reliability; ② Ultra-high brightness white LED light source, which improves the signal-to-noise ratio; ③ High-performance photoelectric receiving devices and RGB three-dimensional measurement principle. The instrument has better anti-interference ability and adaptability; ④ Humanized interface design, easy to use; ⑤ Store up to 100 test results for users and manage them by batch number, convenient for users to check late.
Advantage	Get results in 30 seconds
Test Item	Bromine, Total Alkalinity, pH, Free Chlorine, Total Hardness, Cyanuric Acid, Total Chlorine...
