

ETI 810-280 Digital Dishwasher Thermometer

Dish Temp Dishwasher Thermometer

The Dish Temp dishwasher thermometer simulates a plate as it's cleaned and sanitised in a commercial dishwasher, recording the maximum surface temperature at the touch of a single button

- **Displays maximum temperature reached**
- **Simulates plate surface temperature**
- **Waterproof to IP66**
- **Traceable certificate of calibration (71°C one point only)**

DESCRIPTION

The Dish Temp thermometer eliminates the need for costly and inaccurate test strips and stem thermometers that don't stay in place and don't record temperature at the plate surface.

Built to survive daily use in professional kitchens, the DishTemp dishwasher thermometer indicates temperature over the range of 0 to 90 °C with a resolution of 0.1 °C/°F and an accuracy of ±0.5 °C.

Incorporating a durable water-tight seal, the DishTemp is waterproof to IP66 and is supplied complete with a free traceable certificate of calibration, calibrated at one point only (71°C) .

Reference810-280

Data sheet

Range:	0 to 90°C
Resolution:	0.1 °C/°F
Accuracy:	±0.5 °C
Battery:	3 volt CR2032 lithium coin cell
Battery Life:	5000 hours
Display:	custom LCD
Dimensions:	14 x Ø127mm
Weight:	120 grams
Case Material:	ABS plastic
Guarantee:	one year
Water/Dust Resistance:	IP66

Measurement Scale:	Celsius/Fahrenheit
Certification:	FREE traceable calibration certificate
